

ANTI-CORROSION SYSTEMS

Better protection ensures longer service life

CENARIS corrosion protection systems prolong the service life and thus also the efficiency of your components considerably.

The powder coating corrosion systems are suitable for all common substrates:

- › **Steel up to category C5-I/M**
according to DIN 55633 / DIN 55634 / QUALISTEELCOAT / QIB
- › **Galvanized steel up to category C5-I/M**
according to DIN 55633 / DIN 55634 / QUALISTEELCOAT / QIB
- › **Aluminum**
according to GSB / QUALICOAT

Overview of system properties and benefits:

- › excellent corrosion protection
- › durable, sustainable
- › solvent-free = VOC-compliant
- › zinc-free primer formulation
- › excellent resistance to chemical substances
- › overcoatable with liquid and powder paints
- › wide variety of colours
- › wide range of material approvals available
- › also available as low-temperature system
