

## ANTI-GRAFFITI AND ANTI-POSTER COATING

### The simple solution to two complex challenges

CENARIS has developed a special anti-graffiti and anti-poster powder coating for urban furniture, parking meters, street lights, power distribution boxes, metal facades and other objects. The powder coating makes it possible to easily remove graffiti from the coated surfaces and prevents unwanted material (posters, stickers, etc.) from adhering to the surface.

### The coating is characterised by the following properties:

- > colour neutral, universally applicable clear lacquer
- > excellent scratch resistance and surface hardness
- > highly resistant to chemicals and solvents
- > very good mechanical strength
- > very good weather resistance
- > anti-poster properties are not affected by the removal of graffiti

GRAFFITI TYPE	REMOVAL METHOD
Coloured pens	Wipe with a cloth / soft brush
Shoe polish	Wipe with a cloth / soft brush
Water-based marker	Wipe with a cloth / soft brush
Solvent-based marker	Apply alcohol with a cloth (> 15 cycles possible)
Solvent-based spray paint	Apply MEK with a cloth (> 15 cycles possible)
